Professional Summary

Senior Full Stack & Cloud Infrastructure Engineer with 6+ years building high-throughput microservices and APIs.

Technical Skills

Skills: TypeScript, React, Node.js, Go, Python, PostgreSQL, GraphQL, Docker, Kubernetes, AWS

Professional Experience

Lead Platform Engineer | CloudScale Inc. | Jan 2021 - Present

• Architected distributed ingestion pipeline processing 50k+ requests/sec across 14 Kubernetes clusters.
• Reduced average end-to-end API latency by 35% and cloud infrastructure expenditure by $180,000 annually.
• Led engineering migration from monolith to decoupled event-driven services with 99.99% system uptime.

Software Engineer | Datacore Systems | Jun 2018 - Dec 2020

• Developed streaming telemetry service processing $12M+ in transactions daily using Go and PostgreSQL.
• Automated CI/CD deployment pipelines, cutting release cycle times by 60% across 8 engineering teams.

Education

Bachelor of Science in Computer Science | University of California, Berkeley | Aug 2014 - May 2018

Projects

OpenMesh: High-performance distributed in-memory cache written in Go handling 100k queries/sec.
